

CLEARPASS Ci

ADVANCED PARTIAL BODY SCREENING SYSTEM

WITH ENHANCED DETECTION CAPABILITIES FOR FAST, SAFE
AND PRECISE DETECTION OF ITEMS ON OR INSIDE THE BODY

KEY FEATURES

Fastest scan acquisition time
in the industry

Exceptional mobility

Small footprint (0.85m²)

Easy, hassle free plug & play installation

Automatic dose selection based on BMI

Advanced operator usage
data reporting software

Easy scan area selection
for operator user friendliness

Available with advanced contraband
detection software

CLEARPASS Ci is the world's most advanced, mobile, single module body scanner, specially designed for the detection of contraband "on" or "in" the human body, by allowing selective area focused screening, which reduces screening and overexposure to other parts of the body.

CLEARPASS Ci provides proven, world class, superior image quality and resolution. Leading the industry with the most effective solution for the detection of drugs, weapons, precious stones, metals, electronic devices and other threats such as liquid capsule contraband.

SMART THREAT DETECTION

Automatic intellectual detection and indication of all threats on and inside the human body

- Elements of clothes
- Electronic devices (PCB inside)
- Dangerous items (weapons, drugs)
- Other items not belonging to the human body

CLEARPASS DMS

CLEARPASS DMS can unite X-ray scanners from distant locations into one network keeping track of the total X-ray exposure dose for each inspected person even when the person undergoes a security screening in different locations.

CLEARPASS DMS synchronizes the information: inspected people's accounts, scan records, and X-ray images between all connected devices.

CLEARPASS DMS is a set of applications used to run X-ray people screening systems. The system allows operators to inspect people and view their accounts, perform a security screening, and view the obtained X-ray images.

OPTIONS

- Sanitization
- FDA approved thermometer
- Networking
- JMS Integration
- DruGuard
- A-EYE

CLEARPASS DMS include at least three levels of controlled access including the following:

- An "Operator" level for making scan, creating and filing reports and saving images as require;
- A "Supervisor" level for supervisory staff to update subject information, create / update operators, review images and file data and monitor all operators' activity and data collected;
- An "Administrator" level to create/update/delete user group members with different levels of access, view audit logs, view images, save images to external drives and generate reports;

Automatic drugs detection software algorithms for operator assistance & control

Smart HD images for increased penetration and resolution
